At 5.30 p.m. lat. 10°25 N., long 112°10 E., when a high i sea was running and a strong wind blowing from N.N.W. a strong shock is felt, which is immediately followed by others in the engine room and the engines commenced to race. We went in a body ait being almost oure that the propeller's blades were broken and lost or that the shaft was heavily damaged. Owing to the heavy sea running we are unable to see anything. We stop the engines which, as they do not encounter my ....... were racing at so high a race second that other German Mails, with dates from Borlin to heavy damage might have been done. The steamer was now at the mercy of the sea which struck hor across and caused her to roll so heavily that she was constantly covered by the sea, the same ponetrating into the hold through the hatches. Having tried all means we at last succeeded in closing the same hermatically. At the same time we set all sails we could to get the steamer up and be able to steer her. We have done this by 9 p m. steering S. W. at an average speed of from 2 to 3 miles an hour. Having managed all this as well as we could we considered what breach of the regulations any master, owner steps are to be taken in order to save the lives and the property. Till the actual exor part owner may be arrested without tent of the damages was known, the advice prevailed to try by all means to get clear of the leeward banks and to reach the course taken by the steamers coming from the north. I learn from the onief engineer DR and Mrs Winslow Anderson, who have that the propeller shaft was broken, but nearly completed a two years' tour round he is doubtful whether the whole propeller or part of it is lost. We find more water than usual in the bottom and work the The Pekin yesterday. They have visited Dumps. On deck they are working all the great cities and nights between scrively to increase the surface of the sails as much as possible. There is a high sea running and the wind is blow-

and it is raining in torrents. Thus the night passed. We estimate our speed to be 2-3 miles an hour. At 6 o'clock in the morning, baying sent alt for a fresh jib to replace that one which was carried away by the wind, the boatswain reported the peop to be inundated. I went there and found plenty of water in the stuffing box. We therefore believe that besides the loss of the propeller's blades there are heavy damages in the tube caused probably by the held underneath the engines and is got rid of by the pumps. 25-26 Dec. The galo is still raging. We still do our best to keep the stuffing box dry. Keeping the engine's pumps going we obtain a diminution of the water it the compartment underneath, but the movements of the steamer, caused by the tremendous seas, are so vehement and the water obtains such a force that we fear the atern bulkhead will not stand it. The upper compartment is again inundated owing to the heavy rolling of the steamer. We now tried to shut the stern-tube compartment, and partly succeeded after a good deal of hard work. At about 8 p.m. a tremendous see swept the Chinese cookhouse away, but they could stop and make it fast, thus avoiding further damages. Before this, however, could be executed one Barra Baba, sailor, was atruck by the said cookhouse and had his left arm broken. He was immediately attended by Dr Clandio do Albuguerche—a passenger on board who was suffering severely, yet. I to say, treated him carefully. Another sailor. Mahomed had likewise been wounded, and was also attended by the said doctor. During the night the weather remained unchanged. In the morning it clears up somewhat, the wind is moderating and tends to N.N.E. The sea is still rough, running from N.W. The steamer. does not much obey her rudder as she is making very little headway. The chief officer had thrown out a rope ladder from the poop and descended. He then caught a glimpse of the propeller and found that the nut was touching the rudder. It appeared to him that there were only two blades left, the other two being lost. He could not learn any more as he was compelled by the high seas to go back. Owing to the sky being overcast can't exactly make out our position. We make it lat. 8 57' N., long. 110'14' E at noon,

CANTON. March 11, 1892 For some time troops have been moving southward into the districts of Young Kong and Yenng Ch'un to quell an incipiont rebellion that has hit herto defled the efforts of the local authorities. It is difficult to ascertain any definite news and rumours are many, It is said that the students from two or three districts in the south of the province are unable to proceed to Shin Hing Fu in consequence of the disturbed state of the country. If that be so, the disaffection must be rather wide-spread. Another report states that the robels have captured one or two market towns and are so enabled. to provide themselves with provisions. Ket another report says that the rebels have entrenched themselves in the hills and the soldiers are afraid to attack them. The cause of the uprising is said to be famine. At first the local authorities tried to put down the disturbance by bribes, but such a measure only gave the robbers confidence. so now there is nothing for it but fighting.

THE STRAITS MILITARY CON-TRIBUTION.

"EMBARRASSING THE GOVERNMENT," The Siggapore Free Press, referring to a despatch from the Scoretary of State declining to consider the claim of the colony to some reduction of the military contribution in view of the diminution that has occurred in the revenue of the colony, suggests that the colony should embarrass the Government until its claim is recognised. The manner in which this is proposed to be done is thus set

Now as to the weapon with which we

hope to do battle, it is simple, cheap and terribly effective. Our plan of compaign must be to go directly to the Parliamentary voter and prove to him (to quote from yesterday's article) that, as regards this inflicted a serious injury upon us, that XXIA The Company may from time to they have severely tried our feelings of time, by Special Resolution, reduce its loyalty, and we painfully strained those Capital by paying off Capital or can- relations which ought to exist between celling Capital which has been lost, or this Colony and the Administration of the is unrepresented by available assets, or Mother Country. Our proposed method reducing the limbility on the shares, or is not quite new; it has been already otherwise as may seem expedient, and successfully tried on behalf of this Colony. Capital may be paid off upon the foot- By a brief advertisement in the Standard ing that it may be called up again or a few years ago, repeated daily for a short time, the attention of the British public was called to the defencelessness of this Imperial coaling station, owing to the long delay in supplying armament for the forts. It is amusing and it is besides strong evidence of the power of the influence of advertisement for political purposes to know that the Times, after repeated interthe advertisement, while the Daily Telegraph, also after repeated negotiation, inserted it only once, and immediately Shareholders their Report and Statement withdrew it, -on the specific ground that its insertion would embarrass the Government. As the agent of the gentleman who caused the advertisement to be inserted afterwards wrote: I never had so much trouble before in getting rid of a 25 note. papers noticed it; the late Lord Carnarvon mentioned it in an important letter to the Times; and the final effect was that of all the coaling stations Singapore was first provided with its needed new armament. That is our cas; as the Times summon public meetings, and cause the local press may print a series of the most convincing articles, but all these things are read once, thought over for two opposition papers, perhaps a month at a time, appears in the agony column a concise and intelligible statement of this Colony's grieyance; and the shorter the bet er. Lot's wife looked behind her and was changed into a pillar of salt. locomotive driver in America looked behind him one day last summer and so didn't see an open drawbridge in front of him. Hance a wreck and great loss of life. A man in London failed to look behind him and was run down by a hansom. What-shall we do as a rule? Look behind us or

behind him-after a certain time. How are we on the 9TH APRIL). to take his medning? Why, by letting him explain it. He goes on to say that in one day in February, 1890, he was suddenly seized with dizziness and pain in his head. healthy people, under similar circumstances, he didn't know what to make of it. He says he

felt strange and queer, he shivered as though the weather had suddenly turned cold, and then flushed with the heat as though it had turned hot again. What ailed him? His doctor said he was attacked with influenza, and ordered him to bed. He went to bed. few days later the fover left him, but the illness did not. It merely assumed another form.

His tongue looked like a piece of brown leather, and his skin and the whites of his eyes became yellow, like old parchment. We must all eat to live but when this man tried to est, the food went against him, and after he had awallowed it by main force, it caused such pain in the chest, side, and stomach that he wished he had let it alone. Then his heart began to palpitate, and he says he felt low, languid, and tired. He had what he calls a sinking feeling at the pit of the stomach and a craving which nothing satisfied. Being unable to take any but liquid food ho grow so weak that he was barely able to walk.

Then his heart troubled him once more, and, to quote his own words, 'As I sat in my chair I could hear my heart thumping as if somebody was pounding me on the back. This showed that the heart had too much work on hand and was struggling under it like a house trying to carry two men. I got very little sleep at night, he says, and would lie awake for hours tossing about on the bed: This sort of thing is very wearing, and we are not surprised to learn that he lost flosh until little was left of him but skin and bone. My cheeks, he says, sank in until they were almost drawn together, and people shook their heads and predicted that my time in this world was nearly up. Still I had all confidence in my physician and kept on taking his medicine. From first to last I took some forty or fifty

bottles of it (of all kinds) without benefit. Finally one day the the doctor sounded my lungs and asked me if any of our family died of consumption. / He said that the heart pulpitation was caused by dyspepsia. Then he said I had better take further advice; he could do no more for me. This was after nine months of his treatment. /I gave up all hopes of getting better, and, indeed, no one expected me to.

One day I found a little book or pamphlet in the house, that I had never sean before. It was about a medicine called Mother Seigel's Syrup, and described a case like mine having been cured by it. Without going into all my hopes and leads on the point, it is enough to say that I got a bottle from Mr Kirkman, Chemist, Ellerby Lane. I took the contents of that bottle England, Branco, and Germany by and certainly felt a little better. I took a second trans-Atlantic imes of Steamers. and began to eat solid food, which agreed with

After this I never looked behind me, though my recovery was a work of time, for I was very much reduced. I stuck to the medicine, and with good reason, and at last got back to my work, strong and well, and have remained so ever since. When I went back to the works the fereman and others gathered round me and asked what had wrought the wonderful change. I answer-· Mother Seigel's Syrup had wrought it. When I said I wished to start work they told rue I must first be exemined by a doctor. doctor said I was fit for work and I went to work the next morning and have never lost a minute

I wish others to know what Seigel's Syrup has done for me, and I give the proprietors per mission to publish this brief account of my case I am a cloth presser by trade and have worked at Mesers Hepworth & Sons, Clay Pit Lane, for four years. - Hanvey Asnew, 2, Back Timber

Place, Ellerby Lane, Leeds. The doctor was right in saying that the appear Pittsburg, Penn. ent heart trouble in Mr Askew's case arose from Niagara Falls, N.Y., Bufdyspepsia, for dyspepsia was his only ailment. falo, N.Y.

And if he had used Mother Seigel's Syrup in Washington, D.C., Balti-February, 1890, he would have had no tale to tell, for he would have been all right directly. As it is we are glad that after he did try it he bad no relapse. He never looked behind him.
